

EMBASSY SUSTAINABILITY

Dimmable CFL Lamps

- * 4 times longer life
- * 80% less energy consumption
- * less wasted heat output
- * new energy efficient technology

To save energy, as well as reduce electricity costs and to lower greenhouse emissions, EMBASSY SUSTAINABILITY wanted to use energy efficient compact fluorescent lamps (CFL) instead of incandescent lamps.

However, normal CFL lamps are not dimmable. Dimmable lights are necessary to set mood.

EMBASSY SUSTAINABILITY researched new lighting technology and found Dimmable CFLs.

Dimmable CFLs last four times longer and consume 80% less energy than the incandescent lamps they replaced.

The Dimmable CFL Lamps, shown here in bright, medium and dim settings, are under trial.

The new Dimmable CFL lamps by General Electric, provided by Beacon Lighting, Townsville.
